

U.P. FIBER SPLINT

Reinforcement UHMWPE Splint

Clinical applications

Splinting

- Is Quick, Clean and Simple
- Is comfortable for patient (smooth and highly esthetic)
- Supports teeth effectively
- Has superior durability
- Is easy to remove when necessary

Orthodontic retainer

- Metal free-comfortable for patients
- Aesthetic
- A quick application
- Easy to adapt directly to teeth and bond in place

Implant temporary

- Aesthetic
- Easy to make implant temporary prostheses
- Easy to remove when necessary

Bridges

- Provide strength, durability
- Provide immediate convenience
- Cost effective and reliable
- Aesthetic

Products line-up

U.P. Fiber Splint KIT

- 1mm x 200mm x 1pcs
- 2mm x 200mm x 1pcs
- 3mm x 200mm x 1pcs
- 4mm x 200mm x 1pcs
- Cutting Scissor
- Foil

U.P. Fiber Splint Refills

U.P. Fiber Splint #1
Refill 1mm x 200mm x 2pcs

U.P. Fiber Splint #2
Refill 2mm x 200mm x 2pcs

U.P. Fiber Splint #3
Refill 3mm x 200mm x 2pcs

U.P. Fiber Splint #4
Refill 4mm x 200mm x 2pcs

U.P. FIBER SPLINT

Reinforcement UHMWPE Splint

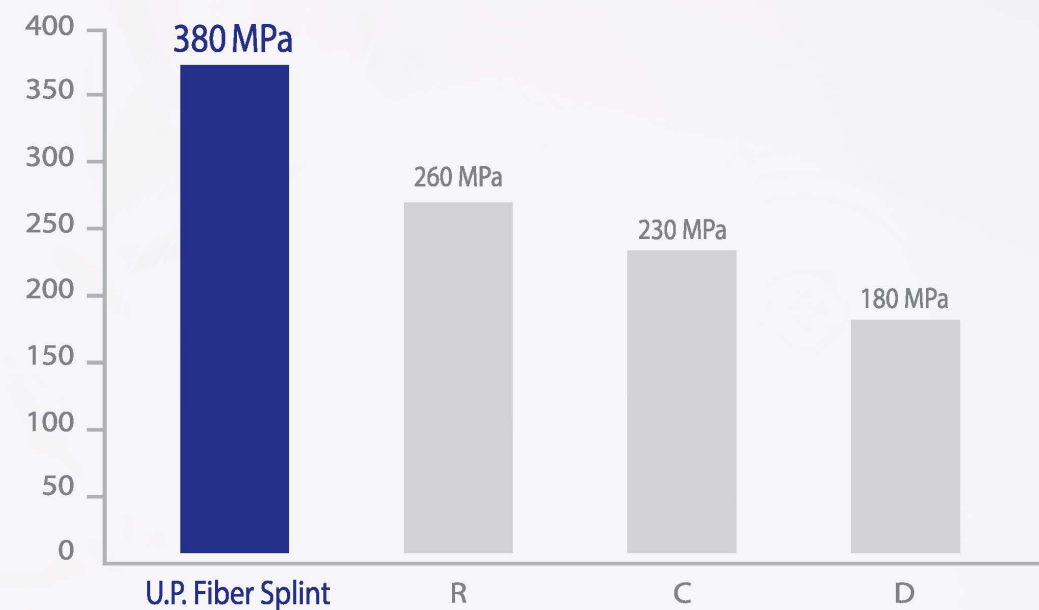

U.P. Fiber Splint provides solution for periodontally compromised mobile tooth, post-trauma mobility and orthodontic treatment stabilization with non-invasive esthetic method.

Advantages

- Dental materials made of Ultra High Molecular Weight Polyethylene
Tensile strength is about 10 times stronger than regular polyethylene
- Biocompatible splinting and orthodontic retainer
- Highly esthetic and comfortable for patient
- Very easy and fast application
- Non-invasive application requiring minimum tooth preparation
- No shelf life, no special conservation required
- Various sizes of width (1,2,3 & 4mm)
- Strong flexural strength of 380Mpa
- Excellent wettability of bonding agent
Great bonding strength with flowable composite resin
- Affordable

The comparative graph of flexural strength for splinting products
